A user has contributed a custom-build package that can be downloaded here This has not been tested, and it's not an official build; yet it has been verified to work on yosemite.. Most others can be very sluggish / sloooooow in comparison to TheWord exe That doesn't matter too much on recent desktops, but on a Wine-like emulator on an ARM device, they would probably be too slow for usability.. Or not?Wed Feb 20, 2013 5:38 pmJoined: Fri Oct 13, 2006 9:02 pmPosts: 140Location: Colorado Springs, CO USA Re: theWord 4 for MAC[OT?]Is anyone aware if there is a Wine-like emulator for the Windows Surface RT (ARM-based) to run x86 native code like TW?Wed Feb 20, 2013 6:16 pmJoined: Tue Aug 29, 2006 2:09 pmPosts: 8613Location: Corfu, Greece Re: theWord 4 for MACWine is a really big project.. Are you aware if there is an equivalent to 'Wine' for Android or iOS? I am pretty much completely ignorant about ARM-based devices like phones and tablets.. 8 it's not WineCostasWed Feb 20, 2013 9:36 amJoined: Fri Oct 13, 2006 9:02 pmPosts: 140Location: Colorado Springs, CO USA Re: theWord 4 for MACX11 is related to displaying widgets? It's been years since I used Unix or Linux.. 0 0 1342) Please, give it a try, you can download it here: <http://www.theword.net/files/mac/4.cea114251b> [McAfee Data Loss Prevention 11.0.600.7 Crack](#)
